Community Digital Plan (part of Ageing Well draft Action Plan '23-24)

Objective 1	Improve the use and quality of data within the Community Service Data Set (CSDS)
Objective 2	Increase the number of community providers utilising the Great North Care Record (GNCR) / Shared Care Record
Objective 3	Increase learning and sharing of digitally enabled community care and support across the ICB

	Goals - description
Goal 1	Increase data quality of the 2-hour UCR standard to support achievement of projected UCR activity. This will ensure that local activity is reflected in the National Dashboard Data source(s): National UCR Monitoring Dashboard and local activity totals reported by providers
Goal 2	Increase the number of community providers onboarded onto the Community Services Data Set (CSDS) Data source: Local CSDS Onboarding Summary Report
Goal 3	Increase the number of community providers onboarded onto the Regional Health Information Exchange (HIE)/GNCR which provides health and social care professionals across NENC secure access to view an individual's extended health and social care information Data source: GNCR team
Goal 4	Establish a working group for CHS Digital to share knowledge and best practice, and to drive transformation opportunities Data source: Community Digital Terms of Reference
